

Recombinant Dog Interleukin-4 (IL4)

Product Code	CSB-EP011659DO-B
Relevance	Participates in at least several B-cell activation processes as well as of other cell types. It is a costimulator of DNA-synthesis. It induces the expression of class II MHC molecules on resting B-cells. It enhances both secretion and cell surface expression of IgE and IgG1. It also regulates the expression of the low affinity Fc receptor for IgE (CD23) on both lymphocytes and monocytes .
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	O77762
Alias	B-cell stimulatory factor 1 ;BSF-1Lymphocyte stimulatory factor 1
Product Type	Recombinant Protein
Immunogen Species	Canis lupus familiaris (Dog) (Canis familiaris)
Purity	≥ 90% as determined by SDS-PAGE.
Sequence	HNFNITIKEIHKMLNILTARNDSCEMELTVKDVFTAPKNTSDKEIFCRAATVLRQIYT HNCNRYLRGLYRNLSMANKTCMNEIKKSTLKDFLERLKVIMQKKYYRH
Research Area	Others
Source	E.coli
Target Names	IL4
Protein Names	Recommended name: Interleukin-4 Short name= IL-4Alternative name(s): B-cell stimulatory factor 1 Short name= BSF-1 Lymphocyte stimulatory factor 1
Expression Region	25-132aa
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
