

CENPJ Antibody

Product Code CSB-PA005213GA01HU Storage Upon receipt, store at -20°C or -80°C. Avoid repeated freeze. Uniprot No. Q9HC77 Immunogen Human CENPJ Raised In Rabbit Species Reactivity Human, Mouse, Rat Tested Applications ELISA, WB, IF Storage Buffer PBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles. Purification Method Antigen Affinity Purified Isotype IgG Alias centromere protein J.CENPJ.BM032;CPAP;LAP;LIP1;MCPH6;MGC131581;MGC131582;MGC142222;MGC142224; Product Type Purified Rabbit Anti human PolyClonal Antibody Immunogen Species Homo sapiens (Human) Target Names CENPJ Target Details This gene encodes a protein that belongs to the centromere protein family. During cell division, this protein plays a structural role in the maintenance of centrosome integrity and normal spindle morphology, and it is involved in microtubule disassembly at the centrosome. This protein can function as a transcriptional coactivator in the Stat5 signalling pathway, and also as a coactivator p300/CREB-binding protein. Mutations in this gene are associated with primary autosomal recessive microcephaly, a disorder characterized by severely reduced brain size and mental retardation.		
Uniprot No. Q9HC77 Immunogen Human CENPJ Raised In Rabbit Species Reactivity Human,Mouse,Rat Tested Applications ELISA,WB,IF Storage Buffer PBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles. Purification Method Antigen Affinity Purified Isotype IgG Alias centromere protein J;CENPJ;BM032;CPAP;LAP;LIP1;MCPH6;MGC131581;MGC131582;MGC1422 22;MGC142224; Product Type Purified Rabbit Anti human PolyClonal Antibody Immunogen Species Homo sapiens (Human) Target Names CENPJ Target Details This gene encodes a protein that belongs to the centromere protein family. During cell division, this protein plays a structural role in the maintenance of centrosome integrity and normal spindle morphology, and it is involved in microtubule disassembly at the centrosome. This protein can function as a transcriptional coactivator in the Stat5 signaling pathway, and also as a coactivator of NF-kappaB-mediated transcription, likely via its interaction with the coactivator p300/CREB-binding protein. Mutations in this gene are associated with primary autosomal recessive microcephaly, a disorder	Product Code	CSB-PA005213GA01HU
Immunogen Human CENPJ Raised In Rabbit Species Reactivity Human,Mouse,Rat Tested Applications ELISA,WB,IF Storage Buffer PBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles. Purification Method Antigen Affinity Purified Isotype IgG Alias centromere protein J;CENPJ;BM032;CPAP;LAP;LIP1;MCPH6;MGC131581;MGC131582;MGC1422 22;MGC142224; Product Type Purified Rabbit Anti human PolyClonal Antibody Immunogen Species Homo sapiens (Human) Target Names CENPJ Target Details This gene encodes a protein that belongs to the centromere protein family. Target Names CENPJ This gene encodes a protein that belongs to the centromere protein family. During cell division, this protein plays a structural role in the maintenance of centrosome integrity and normal spindle morphology, and it is involved in microtubule disassembly at the centrosome. This protein can function as a transcriptional coactivator in the Stat5 signaling pathway, and also as a coactivator of NF-kappaB-mediated transcription, likely via its interaction with the coactivator p300/CREB-binding protein. Mutations in this gene are associated with primary autosomal recessive microcephaly, a disorder	Product Type	Purified Rabbit Anti human PolyClonal Antibody
Target Details This gene encodes a protein that belongs to the centromere protein family. During cell division, this protein plays a structural role in the maintenance of centrosome integrity and normal spindle morphology, and it is involved in microtubule disassembly at the centrosome. This protein can function as a transcriptional coactivator in the Stat5 signaling pathway, and also as a coactivator of NF-kappaB-mediated transcription, likely via its interaction with the coactivator p300/CREB-binding protein. Mutations in this gene are associated with primary autosomal recessive microcephaly, a disorder	Immunogen Species	Homo sapiens (Human)
During cell division, this protein plays a structural role in the maintenance of centrosome integrity and normal spindle morphology, and it is involved in microtubule disassembly at the centrosome. This protein can function as a transcriptional coactivator in the Stat5 signaling pathway, and also as a coactivator of NF-kappaB-mediated transcription, likely via its interaction with the coactivator p300/CREB-binding protein. Mutations in this gene are associated with primary autosomal recessive microcephaly, a disorder	Target Names	CENPJ
	Target Details	During cell division, this protein plays a structural role in the maintenance of centrosome integrity and normal spindle morphology, and it is involved in microtubule disassembly at the centrosome. This protein can function as a transcriptional coactivator in the Stat5 signaling pathway, and also as a coactivator of NF-kappaB-mediated transcription, likely via its interaction with the coactivator p300/CREB-binding protein. Mutations in this gene are associated with primary autosomal recessive microcephaly, a disorder
