GPNMB Antibody

Product CodeCSB-PA009727GA01HUStorageUpon receipt, store at -20°C or -80°C. Avoid repeated freeze.Uniprot No.Q14956ImmunogenHuman GPNMBRaised InRabbitSpecies ReactivityHuman,MouseTested ApplicationsELISA,IHCStorage BufferPBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to warperssion in the lowly metastatic coll lines. GPNMB shows expression in the lowly metastatic coll lines. GPNMB may any involved in growth delay and reduction of metastatic potential. Two transcript variants encoding different isoforms have been found for this gene.		
Uniprot No.Q14956ImmunogenHuman GPNMBRaised InRabbitSpecies ReactivityHuman,MouseTested ApplicationsELISA,IHCStorage BufferPBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein, GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may involved in growth delay and reduction of metastatic potential. Two transcript	Product Code	CSB-PA009727GA01HU
ImmunogenHuman GPNMBRaised InRabbitSpecies ReactivityHuman,MouseTested ApplicationsELISA,IHCStorage BufferPBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic coll lines. GPNMB may involved in growth delay and reduction of metastatic potential. Two transcript	Storage	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
Raised InRabbitSpecies ReactivityHuman,MouseTested ApplicationsELISA,IHCStorage BufferPBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic coll lines. GPNMB may involved in growth delay and reduction of metastatic potential. Two transcript	Uniprot No.	Q14956
Species ReactivityHuman,MouseTested ApplicationsELISA,IHCStorage BufferPBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may involved in growth delay and reduction of metastatic potential. Two transcript	Immunogen	Human GPNMB
Tested ApplicationsELISA,IHCStorage BufferPBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may involved in growth delay and reduction of metastatic potential. Two transcript	Raised In	Rabbit
Storage BufferPBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines. GPNMB may involved in growth delay and reduction of metastatic potential. Two transcript	Species Reactivity	Human,Mouse
thaw cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may a involved in growth delay and reduction of metastatic potential. Two transcript	Tested Applications	ELISA,IHC
IsotypeIgGAliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may involved in growth delay and reduction of metastatic potential. Two transcript	Storage Buffer	
Aliasglycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may I involved in growth delay and reduction of metastatic potential. Two transcript	Purification Method	Antigen Affinity purified
Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may I involved in growth delay and reduction of metastatic potential. Two transcript	Isotype	IgG
Immunogen SpeciesHomo sapiens (Human)Target NamesGPNMBTarget DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may I involved in growth delay and reduction of metastatic potential. Two transcript	Alias	glycoprotein (transmembrane) nmb;GPNMB;HGFIN;NMB ;
Target Names GPNMB Target Details This protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may linvolved in growth delay and reduction of metastatic potential. Two transcript	Product Type	Purified Rabbit Anti human PolyClonal Antibody
Target DetailsThis protein is a type I transmembrane glycoprotein which shows homology to the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may I involved in growth delay and reduction of metastatic potential. Two transcript	Immunogen Species	Homo sapiens (Human)
the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may l involved in growth delay and reduction of metastatic potential. Two transcript	Target Names	GPNMB
	Target Details	the pMEL17 precursor, a melanocyte-specific protein. GPNMB shows expression in the lowly metastatic human melanoma cell lines and xenografts but does not show expression in the highly metastatic cell lines. GPNMB may be involved in growth delay and reduction of metastatic potential. Two transcript
