## PCDHGB3 Antibody

| Product Code        | CSB-PA017592GA01HU   |
|---------------------|--|
| Storage             | Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.  |
| Uniprot No.         | Q9Y5G1   |
| Immunogen           | Human PCDHGB3  |
| Raised In           | Rabbit   |
| Species Reactivity  | Human  |
| Tested Applications | ELISA,WB   |
| Storage Buffer      | PBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.  |
| Purification Method | Antigen Affinity purified  |
| Isotype             | IgG  |
| Alias               | protocadherin gamma subfamily B, 3;PCDHGB3;PCDH-GAMMA-B3 ;   |
| Product Type        | Purified Rabbit Anti human PolyClonal Antibody   |
| Immunogen Species   | Homo sapiens (Human)   |
| Target Names        | PCDHGB3  |
| Target Details      | This gene is a member of the protocadherin gamma gene cluster, one of three<br>related clusters tandemly linked on chromosome five. These gene clusters have<br>an immunoglobulin-like organization, suggesting that a novel mechanism may<br>be involved in their regulation and expression. The gamma gene cluster<br>includes 22 genes divided into 3 subfamilies. Subfamily A contains 12 genes,<br>subfamily B contains 7 genes and 2 pseudogenes, and the more distantly<br>related subfamily C contains 3 genes. The tandem array of 22 large, variable<br>region exons are followed by a constant region, containing 3 exons shared by all<br>genes in the cluster. Each variable region exon encodes the extracellular region,<br>which includes 6 cadherin ectodomains and a transmembrane region. The<br>constant region exons encode the common cytoplasmic region. These neural<br>cadherin-like cell adhesion proteins most likely play a critical role in the<br>establishment and function of specific cell-cell connections in the brain.<br>Alternative splicing has been described for the gamma cluster genes. |
