

MYCBP Monoclonal Antibody

Product Code	CSB-MA8587101A0m
Storage	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
Uniprot No.	Q99417
Immunogen	Recombinant Human MYCBP Protein
Raised In	mouse
Species Reactivity	Human
Specificity	specific for human MYCBP denatured and native forms.
Tested Applications	ELISA,IHC;Recommended dilution:IHC:1:50-1:500
Relevance	The protein encoded by this gene binds to the N-terminus of the oncogenic protein C-MYC, enhancing the ability of C-MYC to activate E box-dependent transcription. The encoded protein is normally found in the cytoplasm, but it translocates to the nucleus during S phase of the cell cycle and associates with C-MYC. This protein may be involved in spermatogenesis. This gene can be silenced by microRNA-22. Two transcript variants, one protein-coding and the other probably not protein-coding, have been found for this gene.
Form	liquid
Conjugate	Non-conjugated
Storage Buffer	Preservative: 0.03% Proclin 300 Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
Purification Method	>95%,protein G purified
Clonality	monoclonal
Alias	MYC Binding Protein,C-Myc Binding Protein,mycbp
Product Type	Monoclonal Antibody
Immunogen Species	Homo sapiens (Human)
Target Names	MYCBP
Clone No.	1D5D5
