

CTNNB1 Monoclonal Antibody

Product Code	CSB-MA922448
Storage	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
Raised In	Mouse
Species Reactivity	Human, Mouse, Rat
Specificity	The β -Catenin Mouse Monoclonal antibody detects endogenous β -Catenin proteins.
Tested Applications	ELISA, WB, IHC; Recommended dilution: WB: 1:500-1:5000, IHC: 1:50-1:500
Relevance	The distinct peripheral cytosolic proteins, alpha, beta and gamma catenin (102, 94 and 86 kDa) are found in many tissues and bind to the conserved cytoplasmic tail domain of the cell adhesion cadherins. Catenins link E cadherin to other integral membrane or cytoplasmic proteins and are modulated by Wnt1 proto oncogene. The central core region of beta catenin is involved in mediation of cadherin catenin complex interaction with EGFR. Beta-Catenin-mediated signalling is involved at several stages of vertebrate neural development.
Form	Mouse IgG1 in phosphate buffered saline (without Mg ²⁺ and Ca ²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Purification Method	Antigen Affinity Purified
Clonality	Monoclonal
Product Type	Monoclonal Antibody
Immunogen Species	Homo sapiens (Human)
Clone No.	26A12
Usage	For Research Use Only. Not for use in diagnostic or therapeutic procedures.
