

# Recombinant Mouse C-X-C motif chemokine 14 protein (Cxcl14) (Active)

|                            |                                                                                                                                                                                     |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Code</b>        | CSB-AP001181MO                                                                                                                                                                      |
| <b>Abbreviation</b>        | Recombinant Mouse Cxcl14 protein (Active)                                                                                                                                           |
| <b>Uniprot No.</b>         | Q9WUQ5                                                                                                                                                                              |
| <b>Form</b>                | Lyophilized powder                                                                                                                                                                  |
| <b>Storage Buffer</b>      | Lyophilized from a 0.2 µm filtered PBS, pH 7.4                                                                                                                                      |
| <b>Product Type</b>        | Chemokine                                                                                                                                                                           |
| <b>Immunogen Species</b>   | Mus musculus (Mouse)                                                                                                                                                                |
| <b>Biological Activity</b> | Fully biologically active when compared to standard. The biological activity determined by a chemotaxis bioassay using human monocytes is in a concentration range of 1.0-10 ng/ml. |
| <b>Purity</b>              | ≥95% as determined by SDS-PAGE.                                                                                                                                                     |

| <b>PubMed ID</b>           | 10049774; 10784614; 10946286; 16141072; 15489334;                                                                                                                                   |

## Image

**Endotoxin**

Less than 1.0 EU/μg as determined by LAL method.

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**Shelf Life**

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
