

Recombinant Human T-cell surface glycoprotein CD1c (CD1C)

Product Code	CSB-MP004891HU
Storage	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
Uniprot No.	P29017
Product Type	Recombinant Protein
Immunogen Species	Homo sapiens (Human)
Purity	>85% (SDS-PAGE)
Sequence	NAD ASQEHVSFHV IQIFSFNQS WARGQSGWL DELQTHGWDS ESGTIIFLHN WSKGNFSNEE LSDLELLFRF YLFGLTREIQ DHASQDYSKY PFEVQVKAGC ELHSGKSPEG FFQVAFNGLD LLSFQNTTWV PSPGCGSLAQ SVCHLLNHQY EGVTTETVYNL IRSTCPRFL LLDAGKMYV HRQVRPEAWL SSRPSLGSGQ LLLVCHASGF YPKPVVWTWM RNEQEQLGTK HGDILPNADG TWYLQVILEV ASEEPAGLSC RVRHSSLGGQ DIILYWGHHF SM
Source	Mammalian cell
Target Names	CD1C
Protein Names	Recommended name: T-cell surface glycoprotein CD1c Alternative name(s): CD_antigen= CD1c
Expression Region	18-302
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Extracellular domain
Target Details	This gene encodes a member of the CD1 family of transmembrane glycoproteins, which are structurally related to the major histocompatibility complex (MHC) proteins and form heterodimers with beta-2-microglobulin. The CD1 proteins mediate the presentation of primarily lipid and glycolipid antigens of self or microbial origin to T cells. The human genome contains five CD1 family genes organized in a cluster on chromosome 1. The CD1 family members are thought to differ in their cellular localization and specificity for particular lipid ligands. This protein is broadly distributed throughout the endocytic system via a tyrosine-based motif in the cytoplasmic tail. Alternatively spliced transcript variants of this gene have been observed, but their full-length nature is not known.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
