

Recombinant Erwinia amylovora Major outer membrane lipoprotein (lpp)

Product Code	CSB-EP355906EMS
Relevance	Interacts with the peptidoglycan both covalently and noncovalently.
Abbreviation	Recombinant Erwinia amylovora lpp protein
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	P02939
Alias	Murein-lipoprotein
Product Type	Recombinant Protein
Immunogen Species	Erwinia amylovora (Fire blight bacteria)
Purity	≥ 90% as determined by SDS-PAGE.
Sequence	CSSNAKIDQLSTDVQTLNAKVDQLSNDVTAIRSDVQAAKDDAARANQRLDNQA HSYRK
Research Area	Microbiology
Source	E.coli
Target Names	lpp
Protein Names	Recommended name: Major outer membrane lipoprotein Alternative name(s): Murein-lipoprotein
Expression Region	21-78aa
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	N-terminal 6xHis-SUMO-tagged
Mol. Weight	22.4kDa
Protein Length	Full Length of Mature Protein
Image	

(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
