

Recombinant Dermatophagoides pteronyssinus Peptidase 1 (DERP1)

Product Code	CSB-EP357315DJH
Relevance	Thiol protease, with a preference for substrates with a large hydrophobic side chain in the P2 position, or with basic residues.
Abbreviation	Recombinant Dermatophagoides pteronyssinus DERP1 protein
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
