

Rabbit Immunoglobulin G

Product Code CSB-NP001501Rb

Relevance IgG is a monomeric immunoglobulin, built of two heavy chains gamma and two light chains. Each molecule has two antigen binding sites. This is the most abundant immunoglobulin and is approximately equally distributed in blood and in tissue liquids, constituting 75% of serum immunoglobulins. It can bind to many kinds of pathogens, for example viruses, bacteria, and fungi, and protects the body against them by complement activation (classic pathway), opsonization for phagocytosis and neutralisation of their toxins. There are 4 subclasses: IgG1 (66%), IgG2 (23%), IgG3 (7%) and IgG4 (4%).

Storage Aliquot and store at -20°C or -80°C. Avoid repeated freeze/thaw cycles.

Tested Applications ELISA, WB, SDS-PAGE

Form Liquid

Storage Buffer PBS, pH 7.4

Alias IgG

Product Type Native Protein

Sensitivity Not test

Purity >95% (SDS-PAGE)

Sequence Full length protein

Research Area Immunology

Source Purified from Rabbit plasma

Protein Names Rabbit Immunoglobulin G

Image

(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.
