

Recombinant Papio cynocephalus Platelet glycoprotein Ib beta chain (GP1BB), partial

Product Code	CSB-EP009686PBR1
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q04785
Product Type	Recombinant Protein
Immunogen Species	Papio cynocephalus (Yellow baboon)
Purity	>85% (SDS-PAGE)
Source	E.coli
Target Names	GP1BB
Protein Names	Recommended name: Platelet glycoprotein Ib beta chain Short name= GP-Ib beta Short name= GPIb-beta Short name= GPIbB Alternative name(s): Antigen CD42b-beta CD_antigen= CD42c
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Partial
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
