

Recombinant Mouse C-X-C motif chemokine 10 (Cxcl10)

| | |
|--------------------------|---|
| Product Code | CSB-EP006240MO |
| Relevance | In addition to its role as a proinflammatory cytokine, may participate in T-cell effector function and perhaps T-cell development. |
| Storage | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C. |

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
