

Virus-Like Particles (VLPs) isotype control

Product Code	CSB-MP3838-C
Abbreviation	VLPs isotype control
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Form	Lyophilized powder
Storage Buffer	Lyophilized from a 0.2 µm filtered PBS, 6% Trehalose, pH 7.4.
Product Type	Virus-Like Particles (VLPs) isotype control
Immunogen Species	N/A
Sensitivity	Not Test
Purity	VLPs
Research Area	Epigenetics and Nuclear Signaling
Source	Mammalian cell
Target Names	/
Notes	The VLPs are expressed from human Chinese hamster ovary cells (CHO). Mix the sample gently by repeatedly pipetting it up and down. Do not vortex. Repeated freezing and thawing is not recommended. The immunization strategy should be optimized (antigen dose, regimen and adjuvant).
Tag Info	Tag-Free
Mol. Weight	56.1 kDa
Protein Length	Full Length
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. Aliquot for long-term storage at -80°C. Solubilize for 60 minutes at room temperature with occasional gentle mixing. Avoid vigorous shaking or vortexing.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
