

# Recombinant Dog Nuclear receptor subfamily 4 group A member 1 (NR4A1), partial

|                          |  |
|--------------------------|--|
| <b>Product Code</b>      | CSB-EP016062DO   |
| <b>Storage</b>           | Store at -20°C, for extended storage, conserve at -20°C or -80°C.  |
| <b>Uniprot No.</b>       | P51666   |
| <b>Product Type</b>      | Recombinant Protein  |
| <b>Immunogen Species</b> | Canis lupus familiaris (Dog) (Canis familiaris)  |
| <b>Purity</b>            | >85% (SDS-PAGE)  |
| <b>Source</b>            | E.coli   |
| <b>Target Names</b>      | NR4A1  |
| <b>Protein Names</b>     | Recommended name: Nuclear receptor subfamily 4 group A member 1<br>Alternative name(s): Orphan nuclear receptor HMR Orphan nuclear receptor NGFI-B   |
| <b>Notes</b>             | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.  |
| <b>Tag Info</b>          | Tag type will be determined during the manufacturing process.  |
| <b>Protein Length</b>    | Partial  |
| <b>Target Details</b>    | This gene encodes a member of the steroid-thyroid hormone-retinoid receptor superfamily. Expression is induced by phytohemagglutinin in human lymphocytes and by serum stimulation of arrested fibroblasts. The encoded protein acts as a nuclear transcription factor. Translocation of the protein from the nucleus to mitochondria induces apoptosis. Multiple alternatively spliced variants, encoding the same protein, have been identified. |
| <b>Reconstitution</b>    | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.  |
| <b>Shelf Life</b>        | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.<br>Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.   |
