

# Recombinant Human CCAAT/enhancer-binding protein delta (CEBPD)

<b>Product Code</b>	CSB-EP005182HU-B
<b>Storage</b>	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
<b>Uniprot No.</b>	P49716
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Homo sapiens (Human)
<b>Purity</b>	>85% (SDS-PAGE)
<b>Sequence</b>	SAALFSLDG PARGAPWPAE PAFPYEPGRA GKPGRGAEPG ALGEPGAAAP AMYDDESAID FSAYIDSMMA VPTLELCHDE LFADLFNSNH KAGGAGPLEL LPGGPAPRLG PGPAAPRLK REPDWGDGDA PGSLPAQVA ACAQTVVSLA AAGQPTPPTS PEPPRSSPRQ TPAPGPAREK SAGKRGPD RG SPEYRQRER NNI AVRKSRD KAKRRNQEMQ QKLVELSAEN EKLHQRVEQL TRDLAGLRQF FKQLPSPFFL PAAGTADCR
<b>Source</b>	E.coli
<b>Target Names</b>	CEBPD
<b>Protein Names</b>	Recommended name: CCAAT/enhancer-binding protein delta Short name= C/EBP delta Alternative name(s): Nuclear factor NF-IL6-beta Short name= NF-IL6-beta
<b>Expression Region</b>	2-269
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	Full Length of Mature Protein
<b>Target Details</b>	The protein encoded by this intronless gene is a bZIP transcription factor which can bind as a homodimer to certain DNA regulatory regions. It can also form heterodimers with the related protein CEBP-alpha. The encoded protein is important in the regulation of genes involved in immune and inflammatory responses, and may be involved in the regulation of genes associated with activation and/or differentiation of macrophages.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
<b>Shelf Life</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life

of lyophilized form is 12 months at -20°C/-80°C.
