SCAMP2 Antibody

cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliassecretory carrier membrane protein 2;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secretor carrier membrane proteins. They function as carriers to the cell surface in progolgi recycling pathways. Different family members are highly related product of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport resources		
Uniprot No.O15127ImmunogenHuman SCAMP2Raised InRabbitSpecies ReactivityHuman,Mouse,RatTested ApplicationsELISA,WB,IHCStorage BufferPBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / traces.Purification MethodAntigen Affinity purifiedIsotypeIgGAliassecretory carrier membrane protein 2;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secretor carrier membrane proteins. They function as carriers to the cell surface in progoli recycling pathways. Different family members are highly related product of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport references.	Product Code	CSB-PA020751GA01HU
ImmunogenHuman SCAMP2Raised InRabbitSpecies ReactivityHuman,Mouse,RatTested ApplicationsELISA,WB,IHCStorage BufferPBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / 1 cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliassecretory carrier membrane protein 2;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secretory carrier membrane proteins. They function as carriers to the cell surface in p golgi recycling pathways. Different family members are highly related produ of distinct genes, and are usually expressed together. These findings sugge that the SCAMPs may function at the same site during vesicular transport re	Storage	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
Raised InRabbitSpecies ReactivityHuman,Mouse,RatTested ApplicationsELISA,WB,IHCStorage BufferPBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / t cycles.Purification MethodAntigen Affinity purifiedIsotypeIgGAliassecretory carrier membrane protein 2;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secretory carrier membrane proteins. IsotypeIgGAliassecretory carrier membrane protein 2;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secret carrier membrane proteins. They function as carriers to the cell surface in pugolgi recycling pathways. Different family members are highly related product of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport responses.	Storage Buffer	PBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.320°C, Avoid freeze / thaw cycles.
Aliassecretory carrier membrane protein 2;Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secret carrier membrane proteins. They function as carriers to the cell surface in progolgi recycling pathways. Different family members are highly related product of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport rates	Purification Method	Antigen Affinity purified
Product TypePurified Rabbit Anti human PolyClonal AntibodyImmunogen SpeciesHomo sapiens (Human)Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secret carrier membrane proteins. They function as carriers to the cell surface in progolgi recycling pathways. Different family members are highly related product of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport rates	lsotype	IgG
Immunogen Species Homo sapiens (Human) Target Names SCAMP2 Target Details This gene product belongs to the SCAMP family of proteins which are secret carrier membrane proteins. They function as carriers to the cell surface in progolgi recycling pathways. Different family members are highly related produ of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport rates	Alias	secretory carrier membrane protein 2;
Target NamesSCAMP2Target DetailsThis gene product belongs to the SCAMP family of proteins which are secred carrier membrane proteins. They function as carriers to the cell surface in progolgi recycling pathways. Different family members are highly related product of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport rates and the same site during vesicular transport rates are site during vesicular transport rates and the same site during vesicular transport rates are site during vesicular transport rates	Product Type	Purified Rabbit Anti human PolyClonal Antibody
Target DetailsThis gene product belongs to the SCAMP family of proteins which are secred carrier membrane proteins. They function as carriers to the cell surface in pro- golgi recycling pathways. Different family members are highly related product of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport ratio	Immunogen Species	Homo sapiens (Human)
carrier membrane proteins. They function as carriers to the cell surface in proteins of distinct genes, and are usually expressed together. These findings sugges that the SCAMPs may function at the same site during vesicular transport responses to the same site during vesicular transport responses.	Target Names	SCAMP2
	Target Details	This gene product belongs to the SCAMP family of proteins which are secretory carrier membrane proteins. They function as carriers to the cell surface in post-golgi recycling pathways. Different family members are highly related products of distinct genes, and are usually expressed together. These findings suggest that the SCAMPs may function at the same site during vesicular transport rather than in separate pathways.
