

Recombinant Oncorhynchus keta L-rhamnose-binding lectin CSL3

Product Code	CSB-YP309229OBG
Relevance	L-rhamnose binding lectin. Has hemagglutinating activity towards rabbit erythrocytes, human type A erythrocytes, human type B erythrocytes, human type O erythrocytes and sheep erythrocytes. Hemagglutinating activity is inhibited by smooth-type lipopolysaccharide (LPS) from <i>S.flexneri</i> 1A, <i>A.salmonicida</i> and <i>E.coli</i> K12, but not by rough-type LPS from <i>S.flexneri</i> , <i>E.coli</i> K12 and <i>E.coli</i> EH100. Agglutinates <i>E.coli</i> K12 and <i>B.subtilis</i> .
Abbreviation	Recombinant Oncorhynchus keta L-rhamnose-binding lectin CSL3 protein
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
