

Recombinant Chicken Troponin C, skeletal muscle (TNNC2)

Product Code	CSB-BP024010CH
Storage	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
Uniprot No.	P02588
Product Type	Recombinant Protein
Immunogen Species	Gallus gallus (Chicken)
Purity	>85% (SDS-PAGE)
Sequence	ASMTDQQAE ARAFLSEEMI AEFKAAFDMF DADGGGDIST KELGTVMRML GQNPTKEELD AIIEEVEDG SGTIDFEEFL VMMVRQMKED AKGKSEEELA NCFRIFDKNA DGFIDIEELG EILRATGEHV TEEDIEDLMK DSDKNNDGRI DFDEFLKMME GVQ
Source	Baculovirus
Target Names	TNNC2
Protein Names	Recommended name: Troponin C, skeletal muscle
Expression Region	2-163
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	Troponin (Tn), a key protein complex in the regulation of striated muscle contraction, is composed of 3 subunits. The Tn-I subunit inhibits actomyosin ATPase, the Tn-T subunit binds tropomyosin and Tn-C, while the Tn-C subunit binds calcium and overcomes the inhibitory action of the troponin complex on actin filaments. This protein is the Tn-C subunit.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
