Recombinant Pig Natriuretic peptides B (NPPB)

Product Code	CSB-MP016021PI
Storage	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
Uniprot No.	P07634
Product Type	Recombinant Protein
Immunogen Species	Sus scrofa (Pig)
Purity	>85% (SDS-PAGE)
Sequence	HPLGG AGLASELPGI QELLDRLRDR VSELQAERTD LEPLRQDRGL TEAWEAREAA PTGVLGPRSS IFQVLRGIRS PKTMRDSGCF GRRLDRIGSL SGLGCNVLRR Y
Source	Mammalian cell
Target Names	NPPB
Protein Names	Recommended name: Natriuretic peptides B Alternative name(s): Gamma-brain natriuretic peptide Cleaved into the following 2 chains: 1. Brain natriuretic peptide 32 Short name= 2. BNP-32 3. Brain natriuretic peptide 26 Short name=
Expression Region	26-131
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	This gene is a member of the natriuretic peptide family and encodes a secreted protein which functions as a cardiac hormone. The protein undergoes two cleavage events, one within the cell and a second after secretion into the blood. The protein s biological actions include natriuresis, diuresis, vasorelaxation, inhibition of renin and aldosterone secretion, and a key role in cardiovascular homeostasis. A high concentration of this protein in the bloodstream is indicative of heart failure. Mutations in this gene have been associated with postmenopausal osteoporosis.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
