

# Recombinant Bovine Deoxyribonuclease-1 (DNASE1)

<b>Product Code</b>	CSB-EP007049BO-B
<b>Storage</b>	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
<b>Uniprot No.</b>	P00639
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Bos taurus (Bovine)
<b>Purity</b>	>85% (SDS-PAGE)
<b>Sequence</b>	LKIAAFNI RTFGETKMSN ATLASIYVRI VRRYDIVLIQ EVRDSHLVAV GKLLDYLNQD DPNTYHYVVS EPLGRNSYKE RYLFLFRPNK VSVLDTYQYD DGCESCGNDS FSREPAVVKF SSHSTKVKEF AIVALHSAPS DAVAEINSLY DVYLDVQQKW HLNDVMLMGD FNADCSYVTS SQWSSIRLRT SSTFQWLIPD SADTTATSTN CAYDRIVVAG SLLQSSVVPG SAAPFDFQAA YGLSNEMALA ISDHYPVEVT LT
<b>Source</b>	E.coli
<b>Target Names</b>	DNASE1
<b>Protein Names</b>	Recommended name: Deoxyribonuclease-1 EC= 3.1.21.1 Alternative name(s): Deoxyribonuclease I Short name= DNase I
<b>Expression Region</b>	23-282
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	Full Length of Mature Protein
<b>Target Details</b>	This gene encodes a member of the DNase family. This protein is stored in the zymogen granules of the nuclear envelope and functions by cleaving DNA in an endonucleolytic manner. At least six autosomal codominant alleles have been characterized, DNASE1*1 through DNASE1*6, and the sequence of DNASE1*2 represented in this record. Mutations in this gene have been associated with systemic lupus erythematosus (SLE), an autoimmune disease. A recombinant form of this protein is used to treat the one of the symptoms of cystic fibrosis by hydrolyzing the extracellular DNA in sputum and reducing its viscosity. Alternate transcriptional splice variants of this gene have been observed but have not been thoroughly characterized.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
