

Recombinant Rat Bcl2 antagonist of cell death (Bad)

Product Code	CSB-MP002528RA
Storage	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
Uniprot No.	O35147
Product Type	Recombinant Protein
Immunogen Species	Rattus norvegicus (Rat)
Purity	≥85% (SDS-PAGE)
Sequence	MGTPKQPSLA PAHALGLRKS DPGIRSLGSD AGGRRWRPAA QSMFQIPEFE PSEQEDASTT DRGLGPSLTE DQPGPYLAPG LLGSIVQQQP GQAANNSHHG GAGTMETRSR HSSYPAGTEE DEGMEELSP FRGRSRSAPP NLWAAQRYGR ELRRMSDEFE GSFKGLPRPK SAGTATQMRQ SASWTRIIQS WVDRNLGKGG STPSQ
Source	Mammalian cell
Target Names	Bad
Protein Names	Recommended name: Bcl2 antagonist of cell death Short name= BAD Alternative name(s): Bcl-2-binding component 6 Bcl-xL/Bcl-2-associated death promoter
Expression Region	1-205
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full length protein
Target Details	This protein is a member of the BCL-2 family. BCL-2 family members are known to be regulators of programmed cell death. This protein positively regulates cell apoptosis by forming heterodimers with BCL-xL and BCL-2, and reversing their death repressor activity. Proapoptotic activity of this protein is regulated through its phosphorylation. Protein kinases AKT and MAP kinase, as well as protein phosphatase calcineurin were found to be involved in the regulation of this protein. Alternative splicing of this gene results in two transcript variants which encode the same isoform.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life

of lyophilized form is 12 months at -20°C/-80°C.
