

Recombinant Human C-C motif chemokine 24 (CCL24)

| | |
|--------------------------|---|
| Product Code | CSB-EP004788HU |
| Storage | Store at -20°C, for extended storage, conserve at -20°C or -80°C. |
| Uniprot No. | O00175 |
| Product Type | Recombinant Protein |
| Immunogen Species | Homo sapiens (Human) |
| Purity | >85% (SDS-PAGE) |
| Sequence | VVIP SPCCMFFVSK RIPENRVVSY QLSSRSTCLK AGVIFTTKKG QQFCGDPKQE WVQRYMKNLD AKQKKASPRA RAVAVKGPVQ RYPGNQ TTC |
| Source | E.coli |
| Target Names | CCL24 |
| Protein Names | Recommended name: C-C motif chemokine 24 Alternative name(s): CK-beta-6 Eosinophil chemotactic protein 2 Eotaxin-2 Myeloid progenitor inhibitory factor 2 Short name= MPIF-2 Small-inducible cytokine A24 |
| Expression Region | 27-119 |
| Notes | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week. |
| Tag Info | Tag type will be determined during the manufacturing process. |
| Protein Length | Full Length of Mature Protein |
| Target Details | This gene belongs to the subfamily of small cytokine CC genes. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. The cytokine encoded by this gene displays chemotactic activity on resting T lymphocytes, a minimal activity on neutrophils, and is negative on monocytes and activated T lymphocytes. The protein is also a strong suppressor of colony formation by a multipotential hematopoietic progenitor cell line. |
| Reconstitution | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference. |
| Shelf Life | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C. |
