

# Recombinant Human DNA-directed RNA polymerase II subunit RPB11-a (POLR2J)

<b>Product Code</b>	CSB-EP347112HU
<b>Storage</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
<b>Uniprot No.</b>	P52435
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Homo sapiens (Human)
<b>Purity</b>	>85% (SDS-PAGE)
<b>Sequence</b>	MNAPPAFESF LLFEGEKKIT INKDTKVPNA CLFTINKEDH TLGNIKSQL LKDPQVLFAG YKVPHPLEHK IIRVQTTPD YSPQEAFTNA ITDLISELSL LEERFRVAIK DKQEGIE
<b>Source</b>	E.coli
<b>Target Names</b>	POLR2J
<b>Protein Names</b>	Recommended name: DNA-directed RNA polymerase II subunit RPB11-a Short name= RNA polymerase II subunit B11-a Short name= RPB11a Alternative name(s): DNA-directed RNA polymerase II subunit J-1 RNA polymerase II 13.3 kDa subunit
<b>Expression Region</b>	1-117
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	full length protein
<b>Target Details</b>	This gene encodes a subunit of RNA polymerase II, the polymerase responsible for synthesizing messenger RNA in eukaryotes. The product of this gene exists as a heterodimer with another polymerase subunit; together they form a core subassembly unit of the polymerase. Two similar genes are located nearby on chromosome 7q22.1 and a pseudogene is found on chromosome 7p13.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
<b>Shelf Life</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life

of lyophilized form is 12 months at -20°C/-80°C.
