

Rabbit anti-Goat IgG Fab Antibody

Product Code	CSB-PA00560E0Rb
Abbreviation	Goat IgG Fab fragment
Storage	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
Immunogen	Goat IgG Fab fragment
Raised In	Rabbit
Species Reactivity	Goat
Tested Applications	ELISA
Relevance	The fragment antigen-binding (Fab fragment) is a region on an antibody that binds to antigens. It is composed of one constant and one variable domain of each of the heavy and the light chain. These domains shape the paratope — the antigen-binding site — at the amino terminal end of the monomer. The two variable domains bind the epitope on their specific antigens.
Form	Liquid
Conjugate	Non-conjugated
Storage Buffer	Preservative: 0.03% Proclin 300 Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
Purification Method	Caprylic Acid Ammonium Sulfate Precipitation purified
Isotype	IgG
Clonality	Polyclonal
Product Type	Secondary Antibody
