

Recombinant Chicken Cathepsin K (CTSK)

Product Code	CSB-EP006192CH
Abbreviation	CTSK
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q90686
Product Type	Recombinant Protein
Immunogen Species	Gallus gallus (Chicken)
Purity	>85% (SDS-PAGE)
Sequence	A PAAVDWRRKG YVTPVKDQGG CGSCWAFSSV GALEGQLKRR TGKLLSLSPQ NLVYCVSNNN GCGGGYMTNA FEYVRLNRGI DSEDAYPYIG QDESCMYSPT GKAACKRGYR EIPEDNEKAL KRAVARIGPV SVGIDASLPS FQFYSRGVYY DTGCNPENIN HAVLAVGYGA QKGTKHWHIWK NSWGTEWGNK GYVLLARNMK QTCGIANLAS FPKM
Source	E.coli
Target Names	CTSK
Protein Names	Recommended name: Cathepsin K EC= 3.4.22.38 Alternative name(s): JTAP-1
Expression Region	120-334
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	This protein is a lysosomal cysteine proteinase involved in bone remodeling and resorption. This protein, which is a member of the peptidase C1 protein family, is predominantly expressed in osteoclasts. However, the encoded protein is also expressed in a significant fraction of human breast cancers, where it could contribute to tumor invasiveness. Mutations in this gene are the cause of pycnodysostosis, an autosomal recessive disease characterized by osteosclerosis and short stature. This gene may be subject to RNA editing.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life

of lyophilized form is 12 months at -20°C/-80°C.
