

Recombinant Sheep Cathepsin D (CTSD)

Product Code	CSB-MP006187SH
Abbreviation	CTSD
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q9MZS8
Product Type	Recombinant Protein
Immunogen Species	Ovis aries (Sheep)
Purity	≥85% (SDS-PAGE)
Sequence	G PIPELLTNYM DAQYYGEIGI GTPPQCFTVV FDTGSANLWV PSIHCKLLDI ACWVHHKYNS DKSSTYVKNG TTFDIHYGSG SLSGYLSQDT VSVPCNPSSS SPGGVTVQRQ TFGIAIKQPG VVFIAAKFDG ILGMAYPRIS VNNVLPVFDN LMRQKLV DKN VFSFFLN RDP KAQPGEELML GGTDSKY YRG SLTYHNVTRQ AYWQIHMDQL DVGSSLTVCK GGCEAIVDTG TSLMVG PVDE VRELHKAIGA VPLIQGEYMI PCEKVSSLPQ VTLKLGKDY TLSPEDYTLK VSQAGTTVCL SGFMGMDIPP PGGPLWILGD VFIGN
Source	Mammalian cell
Target Names	CTSD
Protein Names	Recommended name: Cathepsin D EC= 3.4.23.5
Expression Region	40-365
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	This gene encodes a lysosomal aspartyl protease composed of a dimer of disulfide-linked heavy and light chains, both produced from a single protein precursor. This proteinase, which is a member of the peptidase C1 family, has a specificity similar to but narrower than that of pepsin A. Transcription of this gene is initiated from several sites, including one which is a start site for an estrogen-regulated transcript. Mutations in this gene are involved in the pathogenesis of several diseases, including breast cancer and possibly Alzheimer disease.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
