

Recombinant Human Chorionic somatomammotropin hormone-like 1 (CSHL1)

Product Code	CSB-YP006055HU
Abbreviation	CSHL1
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q14406
Product Type	Recombinant Protein
Immunogen Species	Homo sapiens (Human)
Purity	>85% (SDS-PAGE)
Sequence	VQTV PLSRLFKEAM LQAHRAHQLA IDTYQEFISS WGMEAYITKE QKYSFLHDSQ TSFCFSDSIP TSSNMEETQQ KSNLELLHIS LLLIESRLEP VRFLRSTFTN NLVYDTSDDSD DYHLLKDLLE GQMLMGRLE DGSHLTGQTL KQTYSKFDTN SHNHDALLKN YGLLHCFRKD MDKVETFLRM VQCRSVEGSC GF
Source	Yeast
Target Names	CSHL1
Protein Names	Recommended name: Chorionic somatomammotropin hormone-like 1 Short name= Chorionic somatomammotropin-like Alternative name(s): Lactogen-like
Expression Region	27-222
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	This protein is a member of the somatotropin/prolactin family of hormones which play an important role in growth control. The gene, along with four other related genes, is located at the growth hormone locus on chromosome 17 where they are interspersed in the same transcriptional orientation; an arrangement which is thought to have evolved by a series of gene duplications. Although the five genes share a remarkably high degree of sequence identity, they are expressed selectively in different tissues. This particular family member is expressed in placental villi, although it was originally thought to be a pseudogene. In fact, alternative splicing suggests that the majority of the transcripts would be unable to express a secreted protein. Alternatively spliced transcript variants encoding different isoforms have been identified.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a

concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
