

# Recombinant Human Microfibrillar-associated protein 5 (MFAP5)

<b>Product Code</b>	CSB-YP623799HU
<b>Abbreviation</b>	MFAP5
<b>Storage</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
<b>Uniprot No.</b>	Q13361
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Homo sapiens (Human)
<b>Purity</b>	≥85% (SDS-PAGE)
<b>Sequence</b>	IPLGVNSQR GDDVTQATPE TFTEDPNLVN DPATDETVLA VLADIAPSTD DLASLSEKNT TAECWDEKFT CTRLYSVHRP VKQCIHQLCF TSLRRMYIVN KEICSRVCK EHEAMKDELQ RQ MAGLPPRR LRRSNYFRLP PCENVDLQRP NGL
<b>Source</b>	Yeast
<b>Target Names</b>	MFAP5
<b>Protein Names</b>	Recommended name: Microfibrillar-associated protein 5 Short name= MFAP-5 Alternative name(s): MP25 Microfibril-associated glycoprotein 2 Short name= MAGP-2
<b>Expression Region</b>	22-173
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	Full Length of Mature Protein
<b>Target Details</b>	This gene encodes a 25-kD microfibril-associated glycoprotein which is rich in serine and threonine residues. It lacks a hydrophobic carboxyl terminus and proline-, glutamine-, and tyrosine-rich regions, which are characteristics of a related 31-kDa microfibril-associated glycoprotein (MFAP2). The close similarity between these two proteins is confined to a central region of 60 aa where precise alignment of 7 cysteine residues occurs. The structural differences suggest that this encoded protein has some functions that are distinct from those of MFAP2.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final

concentration of glycerol is 50%. Customers could use it as reference.

### Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
