

Recombinant Bovine F-box only protein 6 (FBXO6)

Product Code	CSB-EP664851BO
Abbreviation	FBXO6
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q3SX24
Product Type	Recombinant Protein
Immunogen Species	Bos taurus (Bovine)
Purity	≥85% (SDS-PAGE)
Sequence	MALVSINQLP ENILLEVFMH VPARQLLRNC RPYCCLWRDL IDLVSLWKRK CLREGYVTED WQPVSDWKV FYFLCSLRRN LLRNPCAED MKSWKIDSNG GDQWKVESLP GAHGTGFPDS KVKKYFVTSY DMCLKSQIID LKAEGYWEEL LDKFRPDIVV KDWFAPRADC GCTYQIRVQL ASADYLVLAS FEPPPVTIHQ WNDKWTEVS HTFSDYPPGV RHIFFQHGGK DTQFWAGWYG PRVTNSSVVI SHRVTRNPPH AMAQP
Source	E.coli
Target Names	FBXO6
Protein Names	Recommended name: F-box only protein 6 Alternative name(s): F-box protein that recognizes sugar chains 2
Expression Region	1-265
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	full length protein
Target Details	This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of the ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. This protein belongs to the Fbxs class, and its C-terminal region is highly similar to that of rat NFB42 (neural F Box 42 kDa) which may be involved in the control of the cell cycle.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final

concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
