

# Recombinant Human 60S ribosomal protein L13 (RPL13)

<b>Product Code</b>	CSB-MP020129HU
<b>Storage</b>	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
<b>Uniprot No.</b>	P26373
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Homo sapiens (Human)
<b>Purity</b>	≥85% (SDS-PAGE)
<b>Sequence</b>	MAPSRNGMVL KPHFHKDWQR RVATWFNQPA RKIRRRKARQ AKARRIAPRP ASGPIRPIVR CPTVRYHTKV RAGRGFSLEE LRVAGIHKKV ARTIGISVDP RRRNKSTESL QANVQRLKEY RSKLILFPRK PSAPKKGDSS AEELKLATQL TGPVMPVRNV YKKEKARVIT EEEKNFKAFA SLRMARANAR LFGIRAKRAK EAAEQDVEKK K
<b>Source</b>	Mammalian cell
<b>Target Names</b>	RPL13
<b>Protein Names</b>	Recommended name: 60S ribosomal protein L13 Alternative name(s): Breast basic conserved protein 1
<b>Expression Region</b>	1-211
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	Full length protein
<b>Target Details</b>	Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L13E family of ribosomal proteins. It is located in the cytoplasm. This gene is expressed at significantly higher levels in benign breast lesions than in breast carcinomas. Transcript variants derived from alternative splicing and/or alternative polyadenylation exist; these variants encode the same protein. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
<b>Shelf Life</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
