

Recombinant Mouse DNA- (apurinic or apyrimidinic site) lyase (Apex1)

Product Code	CSB-EP001900MO
Storage	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
Uniprot No.	P28352
Product Type	Recombinant Protein
Immunogen Species	Mus musculus (Mouse)
Purity	>85% (SDS-PAGE)
Sequence	PKRGKAAA DDGEEPKSEP ETKKSKGAAK KTEKEAAGEG PVLIEDPPDQ KTSPSGKSAT LKICSWNVDG LRAWIKKKGL DWVKEEAPDI LCLQETKCSE NKLPAELQEL PGLTHQYWSA PSDKEGYSGV GLLSRQCPLK VSYGIGEEEH DQEGRVIVAE FESFVLVTAY VPNAGRGLVR LEYRQRWDEA FRKFLKDLAS RKPLVLCGDL NVAHEEIDLR NPKGNKKNAG FTPQERQGFQ ELLQAVPLAD SFRHLYPNTA YAYTFWTYMM NARSKNVGWR LDYFLLSHSL LPALCDSKIR SKALGSDHCP ITLYLAL
Source	E.coli
Target Names	Apex1
Protein Names	Recommended name: DNA-(apurinic or apyrimidinic site) lyase EC= 3.1.-.- EC= 4.2.99.18 Alternative name(s): APEX nuclease Short name= APEN Apurinic- apyrimidinic endonuclease 1 Short name= AP endonuclease 1 REF-1
Expression Region	2-317
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	Apurinic/apyrimidinic (AP) sites occur frequently in DNA molecules by spontaneous hydrolysis, by DNA damaging agents or by DNA glycosylases that remove specific abnormal bases. AP sites are pre-mutagenic lesions that can prevent normal DNA replication so the cell contains systems to identify and repair such sites. Class II AP endonucleases cleave the phosphodiester backbone 5 to the AP site. This gene encodes the major AP endonuclease in human cells. Splice variants have been found for this gene; all encode the same protein.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at $-20^{\circ}\text{C}/-80^{\circ}\text{C}$. The shelf life of lyophilized form is 12 months at $-20^{\circ}\text{C}/-80^{\circ}\text{C}$.
