

Recombinant V-type ATP synthase subunit E (atpE)

Product Code	CSB-YP717819BUI
Abbreviation	atpE
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q662R6
Product Type	Recombinant Protein
Immunogen Species	Borrelia bavariensis (strain ATCC BAA-2496 / DSM 23469 / PBi) (Borrelia bavariensis)
Purity	≥85% (SDS-PAGE)
Sequence	MQFEVKDLIN KIKKDGLEEA ERISNDIIFK AKKEAEEIVA RAEAVGALK AKSEKEINDY KRHALEASRQ AIRDLIGVE KNLKSLFENT LKDNVAEVFS DNDFLSELII KITDSWIKEE KLVIQLNESD FSGLEQILRL KLGKSLKEGI EIKPFKGISK GFKIQKNTG LQYDFSVETI ADILFDYLNRFKEVIKVV
Source	Yeast
Target Names	atpE
Protein Names	Recommended name: V-type ATP synthase subunit E Alternative name(s): V-ATPase subunit E
Expression Region	1-199
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	full length protein
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
