

Recombinant Mouse Bone marrow proteoglycan (Prg2)

Product Code	CSB-BP723430MO
Abbreviation	Prg2
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q61878
Product Type	Recombinant Protein
Immunogen Species	Mus musculus (Mouse)
Purity	≥85% (SDS-PAGE)
Sequence	LHLS SETSDSKSPL MDENLPRDAE ISGPEGEECP PGEELMPLEG EKEEGSGSEG VPGDEGAVSG QDVTVDLQC PKEEDTTSLM GDSGCKTCRY LLVRRACFD KAQSVCRRCY RGTLASIHSF SVNFGIQSAV RGINQGQVWI GGRIKGWGRC KRFRWVDGSS WNFAYWAAGQ PCPGGGRCVT LCTQGGHWRL SHCVKRRPFI CSY
Source	Baculovirus
Target Names	Prg2
Protein Names	Recommended name: Bone marrow proteoglycan Short name= BMPG Alternative name(s): Proteoglycan 2 Cleaved into the following chain: 1. Eosinophil granule major basic protein Short name= 2. EMBP Short name= 3. MBP
Expression Region	17-223
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	This protein is the predominant constituent of the crystalline core of the eosinophil granule. High levels of the proform of this protein are also present in placenta and pregnancy serum, where it exists as a complex with several other proteins including pregnancy-associated plasma protein A (PAPPA), angiotensinogen (AGT), and C3dg. This protein may be involved in antiparasitic defense mechanisms as a cytotoxin and helminthotoxin, and in immune hypersensitivity reactions. It is directly implicated in epithelial cell damage, exfoliation, and bronchospasm in allergic diseases.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final

concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
