

# Recombinant Chicken Programmed cell death protein 10 (PDCD10)

<b>Product Code</b>	CSB-MP730489CH
<b>Abbreviation</b>	PDCD10
<b>Storage</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
<b>Uniprot No.</b>	Q5ZIV5
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Gallus gallus (Chicken)
<b>Purity</b>	≥85% (SDS-PAGE)
<b>Sequence</b>	MRMTMEEMKN EAETTSMVSM PLYAVMYPVF NELERVNLSA AQLTAAFIK AEKENPGLTQ DIIMKILEKK SVDVNFTESL LRMAADDVEE YMIERPEPEF QDLNEKARAL KQILSKIPDE INDRVRFLLQ IKDIASAIKE LLDTVNNVFK KYQYQNRRL EHQKKEFVKY SKSFSDTLKT YFKDGGKAINV FISANRLIHQ TNLILQTFKT VA
<b>Source</b>	Mammalian cell
<b>Target Names</b>	PDCD10
<b>Protein Names</b>	Recommended name: Programmed cell death protein 10
<b>Expression Region</b>	1-212
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	full length protein
<b>Target Details</b>	This gene encodes an evolutionarily conserved protein associated with cell apoptosis. The protein interacts with the serine/threonine protein kinase MST4 to modulate the extracellular signal-regulated kinase (ERK) pathway. It also interacts with and is phosphorylated by serine/threonine kinase 25, and is thought to function in a signaling pathway essential for vascular development. Mutations in this gene are one cause of cerebral cavernous malformations, which are vascular malformations that cause seizures and cerebral hemorrhages. Multiple alternatively spliced variants, encoding the same protein, have been identified.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final

concentration of glycerol is 50%. Customers could use it as reference.

### Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
