

# Recombinant Mouse Clathrin light chain B (Cltb)

<b>Product Code</b>	CSB-MP740256MO
<b>Abbreviation</b>	Cltb
<b>Storage</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
<b>Uniprot No.</b>	Q6IRU5
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Mus musculus (Mouse)
<b>Purity</b>	≥85% (SDS-PAGE)
<b>Sequence</b>	MAEDFGFFSS SESGAPEAAE EDPAAFLAQ QESEIAGIEN DPGFGAPAAS QVASAQPGLA SGAGSEDMST TVNGDVFQEA NGPADGYAAI AQADRLTQEP ESIRKWREEQ KKRLQELDAA SKVTEQEWRE KAKKDLEEWN QRQSEQVEKN KINNRIADKA FYQQPDADTI GYVASEEAFV KESKEETPGT EWEKVAQLCD FNPKSSKQCK DVSRLRSVLM SLKQTPLSR
<b>Source</b>	Mammalian cell
<b>Target Names</b>	Cltb
<b>Protein Names</b>	Recommended name: Clathrin light chain B Short name= Lcb
<b>Expression Region</b>	1-229
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	full length protein
<b>Target Details</b>	Clathrin is a large, soluble protein composed of heavy and light chains. It functions as the main structural component of the lattice-type cytoplasmic face of coated pits and vesicles which entrap specific macromolecules during receptor-mediated endocytosis. This gene encodes one of two clathrin light chain proteins which are believed to function as regulatory elements. Alternative splicing results in multiple transcript variants.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
<b>Shelf Life</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
