| <b>Protein Length</b>    | full length protein   |
| <b>Target Details</b>    | This gene is located in a region close to the locus of the pseudogene of chemokine (C-C motif) receptor-like 1 on chromosome 6. The specific function of this gene has not yet been determined.   |
| <b>Reconstitution</b>    | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference. |
