

Recombinant Human Leucine-rich repeat-containing protein 29 (LRRC29)

Product Code	CSB-EP819894HU
Abbreviation	LRRC29
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q8WV35
Product Type	Recombinant Protein
Immunogen Species	Homo sapiens (Human)
Purity	>85% (SDS-PAGE)
Sequence	MYSSGWPAGA AEPRHGRGRE LAQALGCMHG APSQLASLSL AHCSSLKSRP ELEHQASGTK DACPEPQGPS LLTLRALQEL DLTACSKLTD ASLAKVLQFL QLRQLSLSLL PELTDNGLVA VARGCPSLEH LALSHCSRLS DKGWAQAASS WPRLQHLNLS SCSQLIEQTL DAIGQACRQL RVLDVATCPG INMAAVRRFQ AQLPQVSCVQ SRFVGGADLT LTL
Source	E.coli
Target Names	LRRC29
Protein Names	Recommended name: Leucine-rich repeat-containing protein 29 Alternative name(s): F-box and leucine-rich repeat protein 9 F-box protein FBL9 F-box/LRR-repeat protein 9
Expression Region	1-223
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	full length protein
Target Details	This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. This protein belongs to the Fbls class and, in addition to an F-box, contains 9 tandem leucine-rich repeats. Two transcript variants encoding the same protein have been found for this gene. Other variants may occur, but their full-length natures have not been characterized.

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
