

Recombinant Human Cell death activator CIDE-3 (CIDE C)

Product Code	CSB-MP842636HU
Abbreviation	CIDE C
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q96AQ7
Product Type	Recombinant Protein
Immunogen Species	Homo sapiens (Human)
Purity	>85% (SDS-PAGE)
Sequence	MEYAMKSLSL LYPKSLSRHV SVRTSVVTQQ LLSEPSPKAP RARPCRVSTA DRSVRKGIMA YSLEDLLLKV RDTLMLADKP FFLVLEEDGT TVETEEYFQA LAGDVFVMVL QKGQKWQPPS EQGTRHPLSL SHKPAKKIDV ARVTFDLYKL NPQDFIGCLN VKATFYDTYS LSYDLHCCGA KRIMKEAFRW ALFSMQATGH VLLGTSCYLQ QLLDATEEGQ PPKGKASSLI PTCLKILQ
Source	Mammalian cell
Target Names	CIDE C
Protein Names	Recommended name: Cell death activator CIDE-3 Alternative name(s): Cell death-inducing DFFA-like effector protein C Fat-specific protein FSP27 homolog
Expression Region	1-238
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	full length protein
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
