

# Recombinant Human 60S ribosomal protein L9 (RPL9)

|                          |  |
|--------------------------|--|
| <b>Product Code</b>      | CSB-YP020326HU   |
| <b>Storage</b>           | Store at -20°C, for extended storage, conserve at -20°C or -80°C.  |
| <b>Uniprot No.</b>       | P32969   |
| <b>Product Type</b>      | Recombinant Protein  |
| <b>Immunogen Species</b> | Homo sapiens (Human)   |
| <b>Purity</b>            | >85% (SDS-PAGE)  |
| <b>Sequence</b>          | MKTILSNQTV DIPENV DITL KGRTVIVKGP RGTLRRDFNH INVELSLLGK<br>KKKRLRVDKW WGNRKE LATV RTICSHVQNM IKGVTLGFRY KMRSVYAHFP<br>INVVIQENGS LVEIRNFLGE KYIRRV RMRP GVACSVSQAQ KDELILEGND<br>IELVNSAAL IQQATTVKNK DIRKFLDGIY VSEKGT VQQA DE  |
| <b>Source</b>            | Yeast  |
| <b>Target Names</b>      | RPL9   |
| <b>Protein Names</b>     | Recommended name: 60S ribosomal protein L9   |
| <b>Expression Region</b> | 1-192  |
| <b>Notes</b>             | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.  |
| <b>Tag Info</b>          | Tag type will be determined during the manufacturing process.  |
| <b>Protein Length</b>    | Full length protein  |
| <b>Target Details</b>    | Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L6P family of ribosomal proteins. It is located in the cytoplasm. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. Two alternatively spliced transcript variants encoding the same protein have been found for this gene. |
| <b>Reconstitution</b>    | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.  |
| <b>Shelf Life</b>        | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.  |
