

Recombinant Mouse Macrophage metalloelastase (Mmp12)

Product Code	CSB-YP014659MO
Storage	Store at -20°C, for extended storage, conserve at -20°C or -80°C.
Uniprot No.	P34960
Product Type	Recombinant Protein
Immunogen Species	Mus musculus (Mouse)
Purity	≥85% (SDS-PAGE)
Sequence	R SRWMKRYLTY RIYNYTPDMK REDVDYIFQK AFQVWSDVTP LRFRKLHKDE ADIMILFAFG AHGDFNYFDG KGGTLAHAFY PGPGIQGDAH FDEAETWTKS FQGTNLFLVA VHELGHSLGL QHSNNPKSIM YPTYRYLNPS TFRLSADDIR NIQSLYGAPV KPPSLTKPSS PPSTFCHQSL SFDAVTTVGE KIFFFKDWFF WWKLPGSPAT NITSISSIWP SIPSGIQAAY EIESRNQLFL FKDEKYWLIN NLVPEPHYPR SIYSLGFSAS VKKVDAAVFD PLRQKVYFFV DKHYWRYDVR QELMDPAYPK LISTHFGIK PKIDAVLYFK RHYYIFQGAY QLEYDPLFRR VTKTLKSTSW FGC
Source	Yeast
Target Names	Mmp12
Protein Names	Recommended name: Macrophage metalloelastase Short name= MME EC= 3.4.24.65 Alternative name(s): Matrix metalloproteinase-12 Short name= MMP-12
Expression Region	110-473
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Target Details	Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP s are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. It is thought that This protein is cleaved at both ends to yield the active enzyme, but this processing has not been fully described. The enzyme degrades soluble and insoluble elastin. It may play a role in aneurysm formation and studies in mice suggest a role in the development of emphysema. The gene is part of a cluster of MMP genes which localize to chromosome 11q22.3.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final

concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
