<b>Target Details</b>	The product of this gene localizes to centrosomes and basal bodies. It interacts and colocalizes with several proteins associated with Bardet-Biedl syndrome (BBS).
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
