

# Recombinant Mouse Glutathione peroxidase 2 (Gpx2)

<b>Product Code</b>	CSB-BP872823MO
<b>Abbreviation</b>	Gpx2
<b>Storage</b>	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
<b>Uniprot No.</b>	Q9JHC0
<b>Product Type</b>	Recombinant Protein
<b>Immunogen Species</b>	Mus musculus (Mouse)
<b>Purity</b>	>85% (SDS-PAGE)
<b>Sequence</b>	MAYIAKSFYD LSAIGLDGEK IDFNTFRGRA VLIENVASLU GTTTRDYNQL NELQCRFPRR LVLGFPCNQ FGHQENCQNE EILNSLKYVR PGGGYQPTFS LTQKCDVNGQ NEHPVFAYLK DKLPYPYDDP FSLMTPKLI IWSPVRRSDV SWNFEKFLIG PEGEPFRRYS RSFQTINIEP DIKRLKVAI
<b>Source</b>	Baculovirus
<b>Target Names</b>	Gpx2
<b>Protein Names</b>	Recommended name: Glutathione peroxidase 2 Short name= GPx-2 Short name= GSHPx-2 EC= 1.11.1.9 Alternative name(s): Glutathione peroxidase-gastrointestinal Short name= GPx-GI Short name= GSHPx-GI
<b>Expression Region</b>	1-190
<b>Notes</b>	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
<b>Tag Info</b>	Tag type will be determined during the manufacturing process.
<b>Protein Length</b>	full length protein
<b>Target Details</b>	This gene is a member of the glutathione peroxidase family and encodes a selenium-dependent glutathione peroxidase that is one of two isoenzymes responsible for the majority of the glutathione-dependent hydrogen peroxide-reducing activity in the epithelium of the gastrointestinal tract. Studies in knockout mice indicate that mRNA expression levels respond to luminal microflora, suggesting a role of the ileal glutathione peroxidases in preventing inflammation in the GI tract.
<b>Reconstitution</b>	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
