

Recombinant Human Mitochondrial translation release factor in rescue (MTRFR)

Product Code	CSB-EP880965HU-B
Abbreviation	C12orf65
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q9H3J6
Storage Buffer	Lyophilized from Tris/PBS-based buffer, 6% Trehalose, pH 8.0
Product Type	Recombinant Proteins
Immunogen Species	Homo sapiens (Human)
Purity	>85% (SDS-PAGE)
Sequence	IAVTP VQMAGKKDYP ALLSLDENEL EEQFVKGHGP GGQATNKTSN CVVLKHIPSG IVVKCHQTRS VDQNRKLARK ILQEKVDFY NGENSPVHKE KREAAKKKQE RKKRAKETLE KKKLLKELWE SSKKVH
Source	E.coli
Target Names	C12orf65
Protein Names	Recommended name: Probable peptide chain release factor C12orf65, mitochondrial
Expression Region	36-166
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	Tag type will be determined during the manufacturing process.
Protein Length	Full Length of Mature Protein
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
