

Recombinant Human Variable charge X-linked protein 3 (VCX3A)

| | |
|--------------------------|---|
| Product Code | CSB-YP882058HU |
| Abbreviation | VCX3A |
| Storage | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C. |
| Uniprot No. | Q9NNX9 |
| Product Type | Recombinant Protein |
| Immunogen Species | Homo sapiens (Human) |
| Purity | ≥85% (SDS-PAGE) |
| Sequence | MSPKPRASGP PAKATEAGKR KSSSQPSPSD PKKKTTKVAK KGKAVRRGRR GKKGAATKMA AVTAPEAESG PAAPGPSDQP SQELPQHELP PEEPVSEGTV HDPLSQESEL EEPLSQESEV EEPLSQESQV EEPLSQESEV EEPLSQESQV EEPLSQESEV EEPLSQESQV EEPLSQESEM EELPSV |
| Source | Yeast |
| Target Names | VCX3A |
| Protein Names | Recommended name: Variable charge X-linked protein 3 Alternative name(s): Variable charge protein on X with eight repeats Short name= VCX-8r Variably charged protein X-A Short name= VCX-A |
| Expression Region | 1-186 |
| Notes | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week. |
| Tag Info | Tag type will be determined during the manufacturing process. |
| Protein Length | full length protein |
| Target Details | This gene belongs to the VCX/Y gene family, which has multiple members on both X and Y chromosomes, and all are expressed exclusively in male germ cells. The X-linked members are clustered on chromosome Xp22 and Y-linked members are two identical copies of the gene within a palindromic region on Yq11. The family members share a high degree of sequence identity, with the exception that a 30-bp unit is tandemly repeated in X-linked members but occurs only once in Y-linked members. The VCX gene cluster is polymorphic in terms of copy number; different individuals may have a different number of VCX genes. VCX/Y genes encode small and highly charged proteins of unknown function. The presence of a putative bipartite nuclear localization signal suggests that VCX/Y members are nuclear proteins. This gene contains 8 repeats of the 30-bp unit. |

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
