

# Recombinant Mouse ATP synthase subunit O, mitochondrial (Atp5o)

|                          |   |
|--------------------------|---|
| <b>Product Code</b>      | CSB-EP887575MO  |
| <b>Abbreviation</b>      | Atp5o   |
| <b>Storage</b>           | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.<br>Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.  |
| <b>Uniprot No.</b>       | Q9DB20  |
| <b>Product Type</b>      | Recombinant Protein   |
| <b>Immunogen Species</b> | Mus musculus (Mouse)  |
| <b>Purity</b>            | >85% (SDS-PAGE)   |
| <b>Sequence</b>          | FAKLVRP PVQVYGIEGR YATALYSAAS KEKCLDQVEK ELLRVGQLLK<br>DPKVSLAVLN PYIKRTVKVK SLNDITKREK FSPLTANLMN LLAENGLGN<br>TQGIISAFST IMSVHRGEVP CTVTTASPLD DAVLSELKTV LKSFLSPNQI<br>LKLEIKTDPS IMGGMIVRIG EKYVDMSAKS KIQKLSKAMR EML   |
| <b>Source</b>            | E.coli  |
| <b>Target Names</b>      | Atp5o   |
| <b>Protein Names</b>     | Recommended name: ATP synthase subunit O, mitochondrial<br>Alternative name(s): Oligomycin sensitivity conferral protein<br>Short name= OSCP  |
| <b>Expression Region</b> | 24-213  |
| <b>Notes</b>             | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.   |
| <b>Tag Info</b>          | Tag type will be determined during the manufacturing process.   |
| <b>Protein Length</b>    | Full Length of Mature Protein   |
| <b>Target Details</b>    | This protein is a component of the F-type ATPase found in the mitochondrial matrix. F-type ATPases are composed of a catalytic core and a membrane proton channel. The encoded protein appears to be part of the connector linking these two components and may be involved in transmission of conformational changes or proton conductance.  |
| <b>Reconstitution</b>    | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference. |
| <b>Shelf Life</b>        | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.<br>Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life   |

of lyophilized form is 12 months at -20°C/-80°C.
