

# Recombinant Mouse BH3-interacting domain death agonist (Bid)

|                          |   |
|--------------------------|---|
| <b>Product Code</b>      | CSB-YP002698MO  |
| <b>Storage</b>           | Store at -20°C, for extended storage, conserve at -20°C or -80°C.   |
| <b>Uniprot No.</b>       | P70444  |
| <b>Product Type</b>      | Recombinant Protein   |
| <b>Immunogen Species</b> | Mus musculus (Mouse)  |
| <b>Purity</b>            | >85% (SDS-PAGE)   |
| <b>Sequence</b>          | MDSEVSNQSG LGAEHITDLL VFGFLQSSGC TRQELEVELGR ELPVQAYWEA<br>DLEDELQTDG SQASRSFNQG RIEPDSSESQE EIIHNIARHL AQIGDEMDHN<br>IQPTLVRQLA AQFMNGSLSE EDKRNCLAKA LDEVKTAFFPR DMENDKAMLI<br>MTMLLAKKVA SHAPSLLRDV FHITTVNFNQ NLFSYVRNLV RNEMD  |
| <b>Source</b>            | Yeast   |
| <b>Target Names</b>      | Bid   |
| <b>Protein Names</b>     | Recommended name: BH3-interacting domain death agonist Alternative name(s): p22 BID Short name= BID Cleaved into the following 3 chains: 1. BH3-interacting domain death agonist p15 Alternative name(s): p15 BID BH3-interacting do  |
| <b>Expression Region</b> | 1-195   |
| <b>Notes</b>             | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.   |
| <b>Tag Info</b>          | Tag type will be determined during the manufacturing process.   |
| <b>Protein Length</b>    | Full length protein   |
| <b>Target Details</b>    | This gene encodes a death agonist that heterodimerizes with either agonist BAX or antagonist BCL2. The encoded protein is a member of the BCL-2 family of cell death regulators. It is a mediator of mitochondrial damage induced by caspase-8 (CASP8); CASP8 cleaves this encoded protein, and the COOH-terminal part translocates to mitochondria where it triggers cytochrome c release. Multiple alternatively spliced transcript variants have been found, but the full-length nature of some variants has not been defined. |
| <b>Reconstitution</b>    | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.   |
| <b>Shelf Life</b>        | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life  |

of lyophilized form is 12 months at -20°C/-80°C.
